Subject: FW: Sensory Irritation Comments on Formaldehyde document
Attachments: FormaldehydeTRdraft070113forREVIEW (2) DC Wolf comments_cw.docx; points to consider Caldwell 071813.docx; Formaldehyde Draft 071113 Woodall Jarabek MOA 072413.docx

Mary,

Attached, please find the comments by (1) Annie and George on refocusing the document around MOA.

This also comes up in some of (2) Jane Caldwell's comments.

Immediately below, Jason (Tox Pathways) added his interpretation and opinion regarding #1

Then, at the far bottom, and in the Doug Wolf comments, are suggestions from Charles Wood regarding the respiratory tract pathology section.

You may find it worthwhile to familiarize yourself with these perspectives, if you have time.

-Andrew

Begin Forward from Jason Fritz:

Hello,

I've reviewed the Inhalation groups' comments, and went back through Section 1.2.4 (Respiratory Tract Pathology) briefly to remind myself what kind of "non-cancer" data that we are dealing with.

I'm not sure what kind of feedback you desired, so I'll keep this as brief as possible (yeah, okay, so not "brief"-apologies).

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

I could meet tomorrow (PM I guess?) if you'd like to discuss this further, or if I've missed the mark in terms of what you were asking me to do. Friday is my CWD, but I could meet next week if you prefer.

Hopefully something in there was useful,
Jason

Hi John,
Attached are my comments on the formaldehyde document, which are limited primarily to the respiratory tract pathology sections (as assigned).
